# Dileepa Balasuriya

## Senior Software Engineer

Experienced Senior IT Professional with over 16 years in software development. Proven expertise across the complete SDLC, excelling in time-critical tasks. A skilled team player, adept at code reviews, thriving under pressure, and leading teams to achieve company goals.

## WORK EXPERIENCE

Frontend Development 2010 - Present  
**TOPCODER**

Participating competitions - Front-End Development for more than hundreds of projects : <https://profiles.topcoder.com/dileepa>

- Created Wealth Investment, a Flutter app helps users manage their investment portfolios by providing clear insights into their assets and cash holdings. It's designed to be user-friendly and works well on both mobile devices and desktops, allowing users to track their investments easily.
- Built cross-platform mobile features (iOS/Android) for Project Skyscraper using React Native, focusing on performance optimization and native module integration including interactive dashboards, leveraging Redux for robust state management.
- Built and maintained responsive frontends for two core web applications within an NFT Marketplace ecosystem (User & Admin portals), focusing on seamless integration with backend APIs for real-time data fetching and display.

Senior Software Engineer 2023 - 2024  
**CreativeHub**

- Developed Sparly, a React Native financial mobile app focused on building positive financial habits through features like personalized goal setting, subscription management, and purchase analysis.
- Implemented engaging elements including daily challenges, quizzes, and a gamified reward system to boost user motivation and progress.
- Integrated financial data connectivity (e.g., via Tink) to provide users with actionable insights on spending and saving.

Frontend and Javascript Developer 2018 - 2020  
**VUULR**

- Developed and maintained responsive user interfaces for the Vuulr platform using React, React Native, and AngularJS.
- Collaborated with cross-functional teams to understand and implement project requirements.
- Worked on the implementation of new features, improvements, and updates to enhance the user experience.

Software Engineer 2009 - 2011  
**DIRECTFN/MUBASHER**

- In my capacity as a Software Engineer, I actively contributed to the development of extensive real-time E-Trading projects.
